ICS-WEFE 2027

Word Extended Abstract Guidelines

International Conference on the Sustainability of Water, Energy, Food, and Environment
April 13-15, 2027 | Yarmouk University, Irbid, Jordan

1. Preparing the extended abstract

Authors using Microsoft Word should prepare their extended abstract using the official ICS-WEFE 2027 Word template. Replace all bracketed placeholder text with the contribution information and scientific content. Do not change the page size, margins, fonts, or basic formatting of the template.

- Maximum length: 2 A4 pages, including figures, tables, and references.
- Language: English.
- Enter the official title of one of the eight conference tracks in the Conference Track field.
- Provide the title, author names, affiliations, corresponding author and email address.
- Include the background/objective, methodology or approach, principal results/findings, conclusions/implications, 3-5 keywords, and relevant references.
- The suggested scientific headings may be adapted when appropriate to the discipline, while retaining the required core content.

2. Figures and tables

Figures and tables may be included when they materially support the contribution. They should be clear, appropriately sized, numbered consecutively, and accompanied by concise captions. Authors should ensure that all text within figures remains readable in the final PDF.

3. Equations, symbols, and special characters

Use Microsoft Word's equation tools for mathematical expressions and check that equations, symbols, subscripts, superscripts, and special characters are displayed correctly after conversion to PDF.

4. Conference header and track information

The conference header and other organizer-controlled elements in the official template should not be altered. Authors should enter only the official conference track title and their contribution information in the designated locations.

5. Converting the completed abstract to PDF

After completing the Word template, carefully review the document and ensure that it does not exceed two pages. Use Microsoft Word's Save As or Export function to create a PDF. Open the resulting PDF and verify that the layout, fonts, figures, tables, equations, and references have been preserved correctly.

6. Submission

- Submit only the final PDF through the ICS-WEFE 2027 CMT submission portal.
- Do not submit this guidelines file.
- Unless specifically requested by the organizers, do not upload the editable Word (.docx) file to CMT.
- The CMT submission link will be posted on the conference website when the submission portal becomes available.

7. Optional full paper and proceedings

Acceptance of an extended abstract is for presentation at ICS-WEFE 2027. Submission of a full paper is optional. A separate Call for Full Papers will be announced later for authors who wish to have their work considered for publication in the conference proceedings. Full papers will undergo a separate peer-review process. Acceptance of an extended abstract does not guarantee acceptance of the corresponding full paper for publication.
